

Como / Lounge chair Design / Angeletti-Ruzza

Como is a full collection of seats and tables including a chair and an armchair for the dining area, another armchair with a higher backseat for dining, a lounge armchair, a sofa, a dining table and a coffee table. The frame of dining seats is made by steel tube with diameter 22 and a thickness of 2mm for a high level of outdoor performance. Some steel wires are fixed to the backrest frame as its decorative pattern: these wires are spot-welded by a special projection welding technology, which allows a cleaner wire fusion for a more refined aesthetic effect and a lesser risk of rust. The steel mesh sheet seat plate is hot-zincked and welded to the frame using the before mentioned projection welding technology for high resistance performance in outdoors. Like all EMU products, a cataphoresis pretreatment is provided and then a thermosetting powder coating treatment, which finally produces a layer of homogeneous paint in terms of thickness with an high level of adherence and resistance. Nylon feet supports make it easy to move and protect the product.

Description

Code: **1204**

Typology: **Armchairs**

Collection: **Como**

Static Load: 200 Kg

Cushion Material: Acrylic fabric

Seat Height: 32 cm

Technical Info

Width: **78 cm**

Depth: **76 cm**

Height: **79 cm**

Weight: **8.8 Kg**

Static Load: **200 Kg**

Packaging

Packages: **1**

Pieces for pack: **1**

Dimensions: **82x83x81 cm**

Volume: **0,551 mü**

Polyethylene bag and cardboard box

Materials

Steel

Iron and carbon alloy, with carbon content below 2%, treated to withstand the elements with the unique EMU-Coat anti-corrosion process.

Maintenance: To keep the product in good condition for a long time, we recommend storing it indoors and in a dry place during the winter to prevent condensate from forming. Before the winter and on a quarterly basis, if the products are kept near the sea, it is recommended to clean the metal surfaces with a soft cloth using water or detergent and protect them with Vaseline oil or car wax.

Cushion Material

Acrylic fabric

The 100% acrylic fabrics combined with a polyurethane internal coating. This step makes it water-repellent, highly resistant to UV rays for excellent outdoor performance.

Maintenance: To keep the product in good condition for a long time, we recommend storing it indoors and in a dry place during the winter to prevent condensate from forming. Before the winter and on a quarterly basis, if the products are kept near the sea, it is recommended to clean the metal surfaces with a soft cloth using water or detergent and protect them with Vaseline oil or car wax. Evitare il contatto prolungato con sostanze grasse e/o coloranti che potrebbero venire assorbite dal materiale di rivestimento e dare luogo a macchie permanenti, oltre che deteriorare la struttura del filato. In caso di utilizzo vicino al mare o piscine si consiglia un lavaggio periodico. Lavaggi frequenti: seguire le istruzioni specifiche per ogni materiale riportate sull'apposita etichetta. Utilizzare acqua e detergenti liquidi non abrasivi con PH neutro e incolori. Eventualmente lasciare agire il detergente alcuni minuti. Sciacquare abbondantemente con acqua a temperatura non superiore a 30°C. Nel caso di utilizzo di dispositivi a pressione, tenere la punta del diffusore ad una distanza di almeno 60/70 cm dalla superficie del manufatto. Se necessario ripetere l'operazione. Non utilizzare spugne abrasive per smacchiare e non trattare con candeggina e cloro.
