The working world is changing and – our office furniture is joining this shift.

Well-thought-out design concepts are needed where classical constructs converge with modern ideas that transform the office into any working environment desired. From the contemporary conference room to the informal lounge: it is you alone who decides which furnishings would be best. Be it for studying, relaxing, concentrating, communicating or brainstorming, working is not work in spaces where people can come into their own.

CONFERENCE ROOM

The quickest solution is not always the best one.
That's why our conference room furniture is here to support you by adapting to the situation at hand – and that also goes for long discussions. Suitable design for communication at the highest level: eye level.

Time to take
notes: with the
writing tablet.

So you won't be caught
between two stools.

Why not put
the arms up?

CO-WORKING- & AGILE SPACES

Furniture should be adaptable in places where different kinds of people meet, without having to sacrifice the necessary space for recreation. It can be combined in a number of ways in any environment. For more agility – in the mind, too.

COMPETENCIES

Brunner is best combined with Brunner. That's why each of our range models is turned into a unique piece in no time. Take advantage of countless configuration options – or arrange to have a customised design made. We'll do all the leg work for you.

The charging station is always within reach.

Electrification is an important aspect when it comes to planning conference and training rooms. Cable passages and cable lids for electrification are also practically integrated in the furniture. This allows things to run smoothly and preserves the outstanding visual appearance. All fixtures blend in elegantly with the design.

Intelligent accessories provide security and organisation. Modern conference technology requires a high degree of electrification. We have developed suitable accessories for our tables to prevent tangled cables from taking away from the visual appearance and posing a safety hazard. All cables can be neatly and safely tucked away with cable clips and channels.

FOLDING MECHANISMS

High-quality mechanisms that are easy to use and wear-free. Our high-quality and maintenance-free mechanisms create the foundation for a user-friendly and properly functioning folding mechanism. None of the functionality is lost after repeated assembly and dismantling. They also ensure that the tables remain stable and reliable once they have been set up.

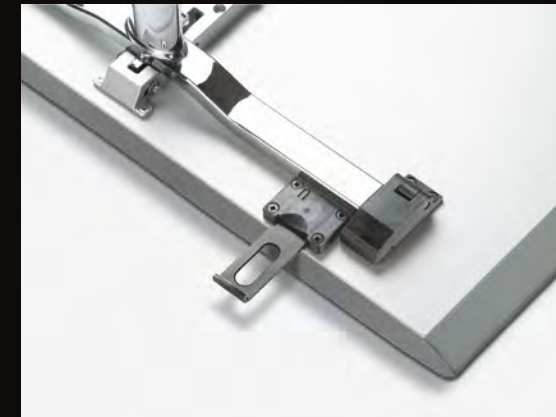

TABLE CONNECTING SYSTEMS

A solid connecting system that you can always rely on. Connecting elements can be used to combine tables in a block or in a row. We offer you different solutions for specific requirements.

Our supplementary furniture.

SCREENS

Discreet and out of sight – screens offer privacy. The leg room can be subtly concealed with different screens. The screens offer protection and discretion, and enhance the uncluttered overall look. We offer screens in different strengths, heights and materials. The connecting elements and mechanisms are determined by the respective requirements.

INTERMEDIATE TOPS

Customised table configurations – always new, always different. Intermediate tops have two key advantages: Changing the top is quick, easy and safe. What's more, optimal table configurations can be put together as needed with numerous top sizes and shapes.

TRANSPORTATION TROLLEYS

Easy to transport with the option of storage to save space. Thanks to intelligent solutions, even large tables can be easily handled and stored to save space. We also offer customised versions for special requirements.

So that you always find
the right style.
