

Como / Round table Design / Jean-Marie Massaud

Como is a full collection of seats and tables including a chair and an armchair for the dining area, another armchair with a higher backseat for dining, a lounge armchair, a sofa, a dining table and a coffee table. The frame of dining seats is made by steel tube with diameter 22 and a thickness of 2mm for a high level of outdoor performance. Some steel wires are fixed to the backrest frame as its decorative pattern: these wires are spot-welded by a special projection welding technology, which allows a cleaner wire fusion for a more refined aesthetic effect and a lesser risk of rust. The steel mesh sheet seat plate is hot-zincked and welded to the frame using the before mentioned projection welding technology for high resistance performance in outdoors. Like all EMU products, a cataphoresis pretreatment is provided and then a thermosetting powder coating treatment, which finally produces a layer of homogeneous paint in terms of thickness with an high level of adherence and resistance. Nylon feet supports make it easy to move and protect the product.

Description

Code: **494+1207**
Typology: **Fixed**
Collection: **Como**

Static Load: 100 Kg

Technical Info

Width: □ **144 cm**
Depth: **144**
Height: **75 cm**
Weight: **14.6 Kg**
Static Load: **100 Kg**

Packaging

Packages: **2**
Pieces for pack: **1**
Dimensions: **112x112x76,5 cm - 150x9x150 cm**
Volume: **1,162 mü**
Polyethylene bag and cardboard box

Materials

Steel

Iron and carbon alloy, with carbon content below 2%, treated to withstand the elements with the unique EMU-Coat anti-corrosio process.

Maintenance: To keep the product in good condition for a long time, we recommend storing it indoors and in a dry place during the winter to prevent condensate from forming. Before the winter and on a quarterly basis, if the products are kept near the sea, it is recommended to clean the metal surfaces with a soft cloth using water or detergent and protect them with Vaseline oil or car wax.
