FUNCTION

Tami is a modular system of sofas targeting both the hospitality contract and retail markets. It's a series consisting of three platforms in three different sizes that is a lounge couch, a two-seater and a three-seater sofa with a great versatility of use. Each platform can match with different arm- and back- rests in order to create some classic configurations. For more current contexts, the customer can choose personalized, more friendly and informal configurations, by adding or subtracting arm- and back- rests or by placing them face to face. Furthermore, you can position the seat cushions in many different ways and decide for a right- or left ground plane.

The Tami series allows many configurations with several different lounge functions as per the specific demands from the hospitality contract market.

Platform configurations can be completed with additional accessories such as a free-standing table or a coffee table fit for many uses such as dining, co-working, functional surfaces for lap-tops or other devices.

Tami comes with a selection of such materials to ensure a good outdoor use, but it also provides a welcome area for hotel spaces, such as rooftops and wraparound terraces.

Its guaranteed performances, its selected materials, the quality of its production processes naturally place this series at high levels for the above-mentioned functions.

MATERIALS

The Tami seating system by Patrick Norguet has a basic structure made from two special 6060 aluminum alloy profiles and details in AISI316 stainless steel.

The slats are made from WPC Bamboo, a composite of recycled bamboo wood and fibers; an eco-friendly material that is resistant to water, atmospheric agents and bacteria, easy to clean and 100% recyclable.

Special injection-molded nylon parts are used to assemble backs and armrests, made from tubular and in 6060 aluminum alloy.

The fabric are made from 100% Polypropylene Outdoor, and the seat padding is in polyurethane foam with a 100% cotton fabric inner lining with water repellent treatment.

Density of polyurethane foam allows a greta confort with ideal seating corners.

In order to support stability for a long time, the foam is internally quilted for guarantee performance. That allows the quick dry: water passes through fabric cover and slips on the inner cotton cover without any track.

All cushion covers are removable.

MAINTENANCE

For best care in an outdoor environment of the platform, it is recommended that the product be cleaned periodically:

- for dust and debris: use a vacuum cleaner to remove dirt and debris;
- for dirt stains: clean with a laundry brush using neutral soap and lukewarm water;
- for oily stains: pat promptly with absorbent paper and clean the area with lukewarm water and neutral soap.

Do not use pressure washing devices, which can damage the product. Do not use bleach or chlorine-based detergents. Do not use highly acidic or highly alkaline detergents. Use neutral detergents, best if diluted in water.

About cushions, that have removable cover, please keep attention to the following instructions. Avoid prolonged contact with greasy substances and/ or dyes or colorants that could be absorbed by the covering material and cause permanent stains, as well as deteriorating the yarn structure. In the case of use near the sea or swimming pools, periodic washing is recommended.

Use water and non-abrasive, colorless, neutral PH liquid detergents. If necessary, allow the detergent to act for a few minutes. Rinse thoroughly with water at a temperature not higher than 30°C (86°F). If pressure cleaning devices are used, keep the tip of the nozzle at a distance of at least 60-70 cm from the surface of the product. If necessary, repeat the operation. Do not use abrasive sponges to remove stains and do not treat with bleach or chlorine.
