MODULES

The Cocoon furniture series consists of modules in various sizes. The modules can be combined in various ways, so the function of the furniture depends on the combination and the position of the modules - FORM FOLLOWS FUNCTION. Create zones and seating areas with this colorful series of furniture.

V

The Vertical Cocoon can be used as either a freestanding piece of furniture, a room divider or as a seat integrated into any shelving system.

T

A browser for the younger users of the library. The browser has three compartments and two dividers.

TI

This table display can be used as a freestanding piece of furniture or in combination with the Cocoon seating, creating an inspirational space in your library.

H

Use the Horizontal Cocoon to display the newest books or to create a hiding place for the younger readers. Both ends have shelves for storage and display.

CD

A model similar to the Horizontal Cocoon, this piece is ideal for presenting your CD's and DVD's as well as creating a play area for children.

S

This seating fits in perfectly with the other models of the Cocoon series. Place several seats in a small cluster to create a cozy atmosphere.

The individual smaller modules can be used for seating, a table, a browser or small shelving. Position the module horizontally with the curve upwards, and you have a small movable seat. With the curve downwards, the module can be used as a movable browser or a table. Position the module vertically and you have a small shelving for storage and display. The functions have the same design layout, but still offer you the possibility of personalizing the furniture with graphics and colors to fit your library.

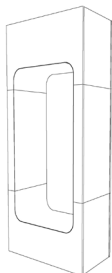

COCOON

MODULES

Vertical Cocoon

Available in two seating heights - one for children (H30 cm) and one for adults (H39 cm).

V

Size

H205 x W97 x D54 cm

9400

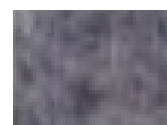

Red
9401

Purple
9402

Green
9403

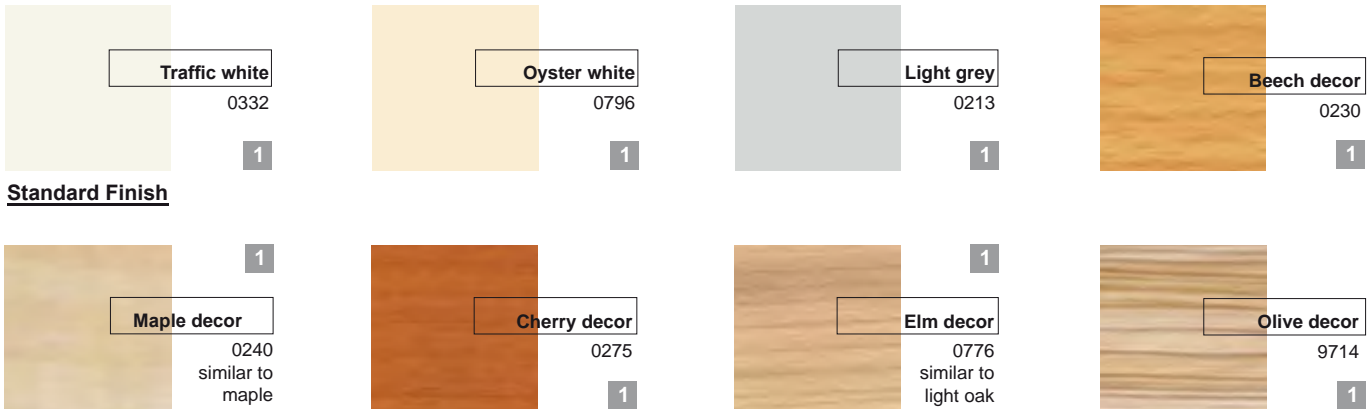

Grey
9404

Surfaces

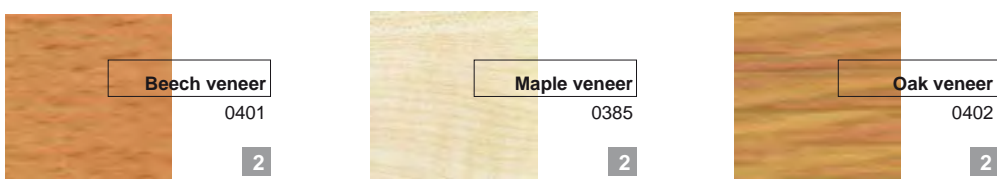

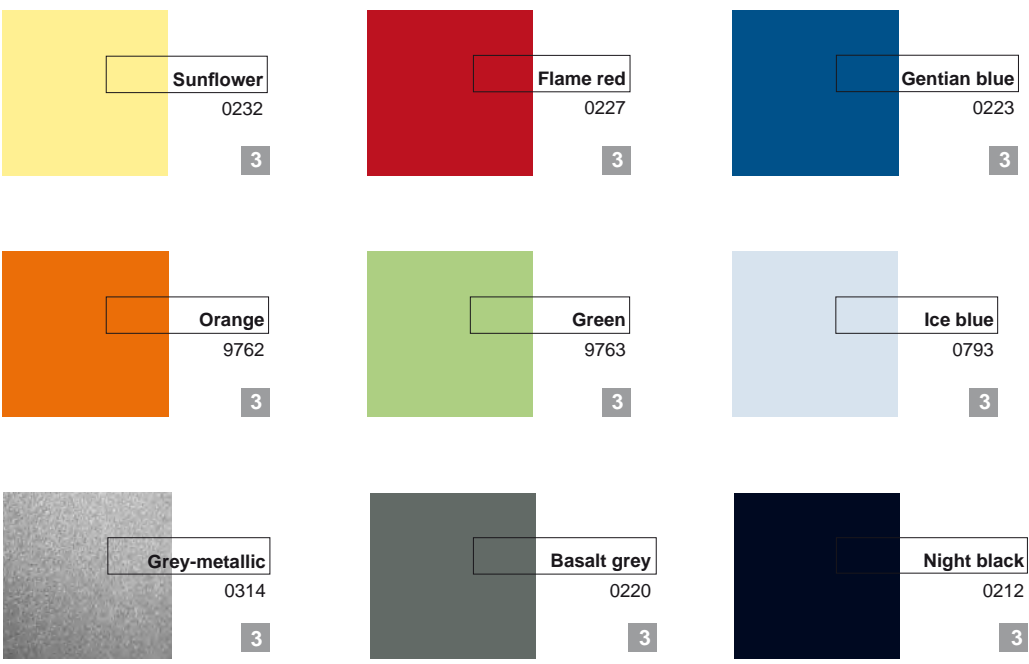

from solid wood veneer and plastic

Traffic White (See first finish below) is the standard finish. Other laminates and veneer available at premium charge.

Wooden surfaces are either directly plastic-coated or covered with an HPL laminated plastic, depending on their application. Differences in colour underline the characteristics of solid wood surfaces and cannot be avoided. Solid wood changes its colours under the influence of light. Table and work surfaces with solid wood veneer have only limited abrasion resistance. We recommend our highly resistant plastic decors for these types of surfaces. We use environmental-friendly lacquers for our solid wood surfaces.

Standard Finish

Other surfaces and veneers upon request.
