

SOFTLINE/SLIMLINE/FRONTLINE
SHELVING SYSTEM

Our wooden shelving system known as Softline/Slimline/Frontline offers one of the most functional and flexible shelving designs in the market. Shelving bays may be combined into a shelving system, using sections and shelves for easy rearrangement, expansion, and add-ons, without expert assistance. The two wood end panels of the starter section are smooth and veneered on the outside, with holes for wooden or steel shelves on the inside. The inner upright panel has holes on both sides. The shelving bays are joined using either an open steel frame or a wooden back. This solution makes it easy to add or remove individual bays without disassembling the other bays.

Softline comes with standard bull-nosed edges on the end panels; Slimline has straight edges on the end panels; Frontline has straight edges and a “flusher” finish with the front panel and shelves. Additionally, this system offers end panel bays, magazine singles and radius shelving which can create winding shelving bays. The possibilities are endless!
