NEW ORDER

Developed in collaboration with HAY, Stefan Diez's New Order is a modular shelving and table system designed to fit the ever-changing boundaries of contemporary workspace and living environments. The simple open-grid construction serves as a flexible and functional framework, enabling the user to create customised open or closed storage solutions with optional drawers, doors and panels.

New Order's multifunctional tables are suitable as dining tables or meeting tables, used alone in a private setting or integrated with the shelving system and other space management components to make personalised workspace solutions. Diverse colour and material options extend the design possibilities, offering a versatile and aesthetic system.

STEFAN DIEZ

Stefan Diez is a Munich based German industrial designer who founded his studio in 2003. The son of a cabinetmaker, where he received his first training, his approach to design is always firmly rooted in the workshop, where he gets to indulge his passion for material experimentation. He is a graduate of the Academy of Fine Arts and Design in Stuttgart and his products have received international acclaim, including winning the iF Gold Award and the Red Dot best of design award.

Diez takes a future facing approach to design, advocating the notion that design should be about creating durable quality products for generations to come. Diez is an exacting designer, a strong generator of ideas and is always rigorous in his quest to fathom the true practicalities of furniture production. For HAY, he has designed the New Order Shelving System, New Order Tables and and Rope Trick lamp.

FRAMEWORK

New Order functions like a framework or a backbone for a given workspace. It is sleek and contemporary in its aesthetic, and yet it is discreet enough not to interfere with or determine the look of a room. It offers architectural structure and can be endlessly modified or adjusted over time, so that it evolves and grows with the needs of a user. It also creates an open and inviting environment by offering the possibility to display or exhibit work, rather than hiding it away inside drawers or within the private space of a computer screen.

A stack of books is visible on a shelf. The top book has a yellow spine and a black cover with white text that reads "SYMBOLIC SPACE: ARCHITECTURE IN CONTEMPORARY PHOTOGRAPHY" and "ELIAS EDSTINE". Below it is a book with a green spine and gold lettering that reads "Design Contemporary". In the foreground, a dark grey metal folder is open, with a metal clasp visible on the right side. The text "PRODUCT INFORMATION" is overlaid in white, bold, sans-serif font across the center of the image.

PRODUCT INFORMATION

CONFIGURATOR

Our interactive 3D configurator enables you to design the ideal New Order system to suit your needs. Experiment with different combinations, select colours and materials, and add drawers and shelves to create the perfect solution.

The configurator also allows you to save and share your design, or to download DWG, as well as finding prices and an item list for your finished product.
