A MESSAGE

CELEBRATING 116 YEARS OF CRAFTS HERITAGE

Parla is an Istanbul based family business, with crafts heritage spanning four generations.

We know why we shine bright;

We are talented.
We love craft.
We are tech oriented.
We work hard.
We move fast.
We are agile.
We are fully collaborative.
We thrive on problem solving.
We are a dedicated project partner.

We achieve the dreams of our project partners and we shine brighter together!

A message from the Light Bearers of Parla

←
Hakan Oztuncman
Owner Director

→
Burak Oztuncman
Owner Director

At Parla we are dedicated to chasing the light.

The blessed light of our great grandfather who started this business as a loyal and respected furniture maker of The Ottoman Imperial Family.

The guiding light of our father, who taught us that we must take care of our customers and employees equally.

The sparkling light of our talented designers and hard-working factory workers.

And the light we see in the faces of our delighted customers.

At Parla what uplifts our day is not just creating beautiful pieces of furniture but creating exceptional, outstanding outcomes and constantly raising the bar when it comes to quality and care.

This vision has built Parla into a reliable, resilient, and globally respected company that designs, crafts and manufactures pieces that stand the test of time.

Every day, we are ready than ever; we are here to add light into your projects, and shine brighter together with you.

Fusing Crafts & Design

The history of Parla began in 1910 with the great grandfather of the current owners crafting furniture for the Ottoman Empire. Over time, and generations, we developed the Parla brand which is a modern operation with a showroom and 15,000 sqm factory in Istanbul plus presence in London, New York, Miami, and Dubai.

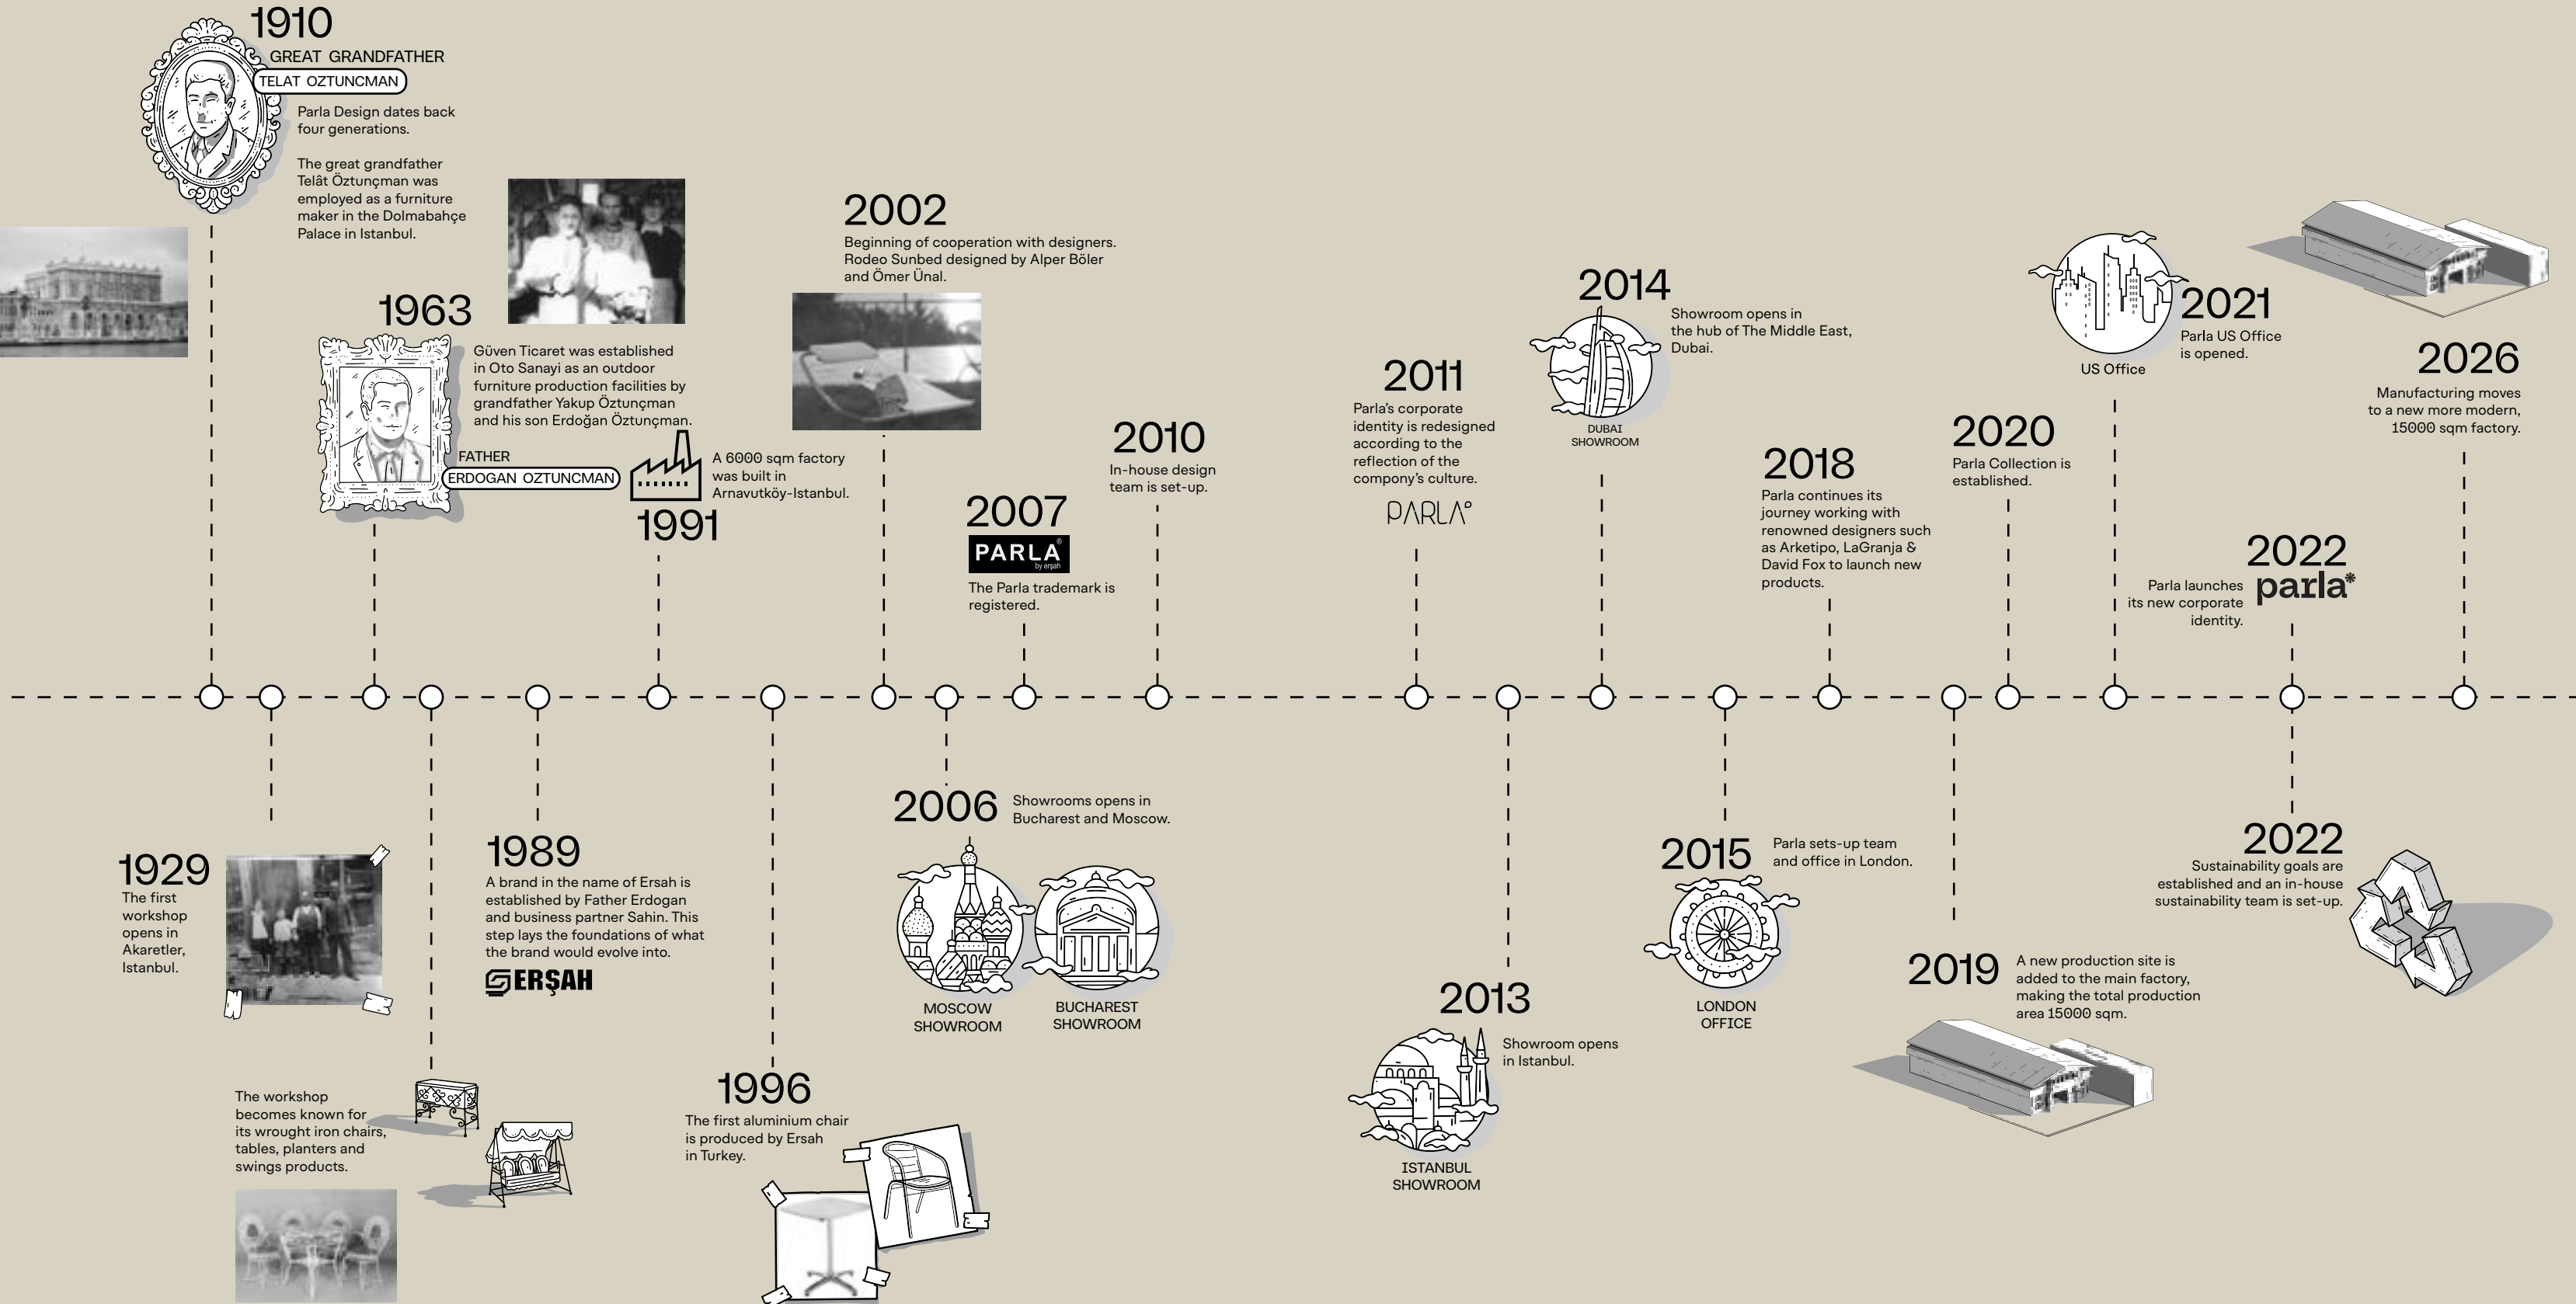

With an in house team of 15 young and dynamic designers, a factory of highly skilled craftsmen in areas such as wood, metal, glass and upholstery, over 200 employees are working tirelessly to continue the legacy.

Additionally, through our Product Creation Workshops, we invite leading architects and designers to collaborate with us directly. These sessions merge creative vision with our deep technical expertise, traditional and modern craft techniques, and cutting-edge production technology.

We operate worldwide, but we intentionally embed ourselves within each region we serve. This “global reach, local presence” model allows us to provide seamless logistical coordination across time zones while ensuring hands-on support at every stage. Clients experience continuity from initial design development through engineering, prototyping, manufacturing, delivery, installation, and aftersales.

At Parla, quality is not only in the finished product — it is embedded in the way we think, collaborate, craft, manufacture and deliver.

Heritage of Parla

A Sustainable Future

We really do care...

About the environment, about society, about the economy.

We care about how we impact the environment.

With our internal sustainability team, we base our studies on GRI methods and aim to reach UN's Sustainable Development Goals.

We manufacture with sustainability in mind, constantly developing ways to be more in harmony with nature when using our resources.

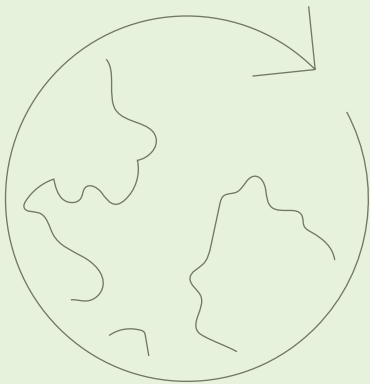

And, like many companies in this sector we realise this is a 'work in progress'. Everyday we are exploring more about what we can do and how we can implement changes.

Using the UN Sustainable Development Goals list of 17 main subjects as a yardstick, we all take part in prodding, probing, and pushing the whole company to do better.

Basing our approach on GRI Standards we are working on developing all environmental, social, and economic aspects of our company.

**SUSTAINABLE
DEVELOPMENT
GOALS**

Our Progress So Far...

1 RAW MATERIALS & SUBSTANCES

- PVD Coating
- Water based adhesives
- PE Rope
- FSC Certified Wood
- REACH compliant steel
- Foams that pass RoHS testing

2 PAINTS & VARNISHES

- Low VOC water based paints, stains & varnishes

3 FABRICS

- Oeko-Tex, Greenguard and/or EU Eco Label certificated fabrics
- Vegan faux leather
- Outdoor fabrics made from recycled materials

4 PACKAGING

- Card board packaging made from recycled materials
- Biodegradable plastic bags
- Packaging that is recyclable

5 ENERGY CONSUMPTION

- Green electricity
- Automatic water taps
- Responsible waste disposal

6 CARBON EMMISSIONS

- Carbon offset shipping
- Staff transport service

7 EQUALITY & SOCIAL RIGHTS

- High staff retention
- 1st & 2nd generation blue collar employees working together.
- 25% of employees under the age of 30
- 50% of white collar employees are women

8 IN THE COMMUNITY

- Product design educational programmes with local and international universities
- Internship programmes for new graduates

9 ECONOMIC SUSTAINABILITY

- Long term employment opportunities for locals
- 2 generations from the same family working side by side
- Stable preservation of furniture hand crafts

Parla Bespoke

Parla Bespoke offers a service that is customer centric, handcrafts oriented and value engineered. Projects delivered to luxury restaurant, hotel and cruise ship interiors span worldwide, and brands such as Mandarin Oriental, The Peninsula, Four Seasons & Six Senses are a selection of the many esteemed hospitality venues we supply FF&E and in some cases also fitted furniture.

We are proud to say that, over the years, we have delivered case goods, fixed furniture and upholstered items to projects in collaboration with more than 500 restaurants and hotels in over 60 countries. Alongside hotels and restaurants, cruise ships, offices and large residential settings are also projects we are delivering to.

The Process

1

Discovery

Wherever you are, our teams are ready to invite you to our factory in Istanbul to experience Parla's excellent customer service.

2

Briefing and Detailed Specification

Briefly explain your design request to our design representatives. Our teams will then prepare precise shop drawings and material samples for your approval.

3

3D Design and Approval

Our shopdrawings are prepared in 3D for a better understanding. Approve your orders via e-mail, by accepting Parla's shopdrawings and order confirmation documents.

4

Prototyping

A prototype will be created for your review before the flow production, which can be sent to you or viewed at the factory as per your request.

5

Manufacturing

Production starts at the factory. Manufacturing of items takes 4 to 6 weeks

6

Quality Control

Quality control tests are carried out in our factory by our teams. You can also inspect the goods or view our reports.

7

Delivery and Installation

Items are packed and shipped to you, anywhere in the world. Every month our logistics team dispatch over 30 containers of furniture headed to Hospitality and F&B projects globally.

8

After Sales

PARLA will continue to be your solution partner, offering you 24 months of warranty and supporting you with any issues or further requests that you may have.

Our Design Ethos

FUSION

In each of our designs we fuse influences from our rich cultural heritage and the artisanal. We apply this to design, to form, to technique and to use of materials.

HARMONY

Every piece of furniture we design, craft and manufacture is a true reflection of our client's vision and sits in harmony with the environment it is being placed in.

RESPECT TO RESOURCES

In both design and manufacturing we set limits to how we apply our vast pool of resources and knowledge so that we are not exorbitant with the use of time, materials and labour.

Designers

Deniz Albayrak

After studying Industrial Design at Anadolu University Deniz moved to Istanbul and joined Parla. Deniz's designs are charming yet functional, whilst blending materials expertly.

Aysel Ilisik Aydinok

Further to studying Industrial Design at Anadolu University, Aysel's design input at Parla has resulted in one of our most popular, functional product families: Mate.

Betul Inci

Having studied Industrial Product Design at Istanbul Technical University and Linnaeus University in Sweden, then furniture design at The Florence Institute of Design, Betul uses multicultural influences within her minimalist yet bold design style that wins international design awards.

Berrak Ilkcan Sener

After studying Industrial Design at Anadolu University Berrak took part in a student exchange at HAWK Hochschule in Germany. Her designs focus on timeless, functional, and user-friendly products with a clean aesthetic. Her Rimo Armchair won a BigSee award.

Yasemin Derici Ceri

A designer with a background in Industrial Design, Yasemin's designs for Parla highlight our capability for expertly manufacturing meticulously designed multi material products.

Erden Dereli

After graduating from Anadolu University, Erden interned at d'Arc Studio Roma before joining Parla as an Industrial Designer and later as a Production Planning Manager. A co-founder of Parla Studio, he now specializes in production processes, focusing on materials, functionality, manufacturability, and R&D.

Tugce Yakup

Having studied Industrial Design at Bilgi University, Tugce has developed her design approach to provide an embracing experience for the user by incorporating rounded shapes, plush accents, sustainable materials and minimalism resulting in award winning products.

Seda Yetkiner

After studying Industrial Design at Anadolu University Seda's began her career at Yakamoz Glass, where she mastered hot glass production. Joining Parla Design Studio in 2019, she expanded her expertise with new materials creating award winning designs that feature bold, functional shapes with elegant details.

Enis Altinkaynak

A graduate of Anadolu University with a Master's Degree from Marmara University, Enis embraces all design ideologies but prefers a totalitarian approach, constantly seeking excellence in materials and production processes.

Buket Hoscan Bazman

Buket Hoscan Bazman, born in Izmir in 1989, founded 'Marbleous' in 2015, creating marble-detailed furniture and objects. In 2018, she opened her own design studio, focusing on contemporary collectible pieces made using traditional craftsmanship and natural materials by Turkish artisans.

David Fox

David Fox Design is a multi-award-winning industrial and product design studio with accolades including Red Dot and Good Design Award. Their work spans furniture, bathroom basins, faucets, hardware, fabric, and carpet design. They serve clients across Belgium, Turkey, UK, Italy, and more.

Burcu Ozdamar

After graduating from Middle East Technical University, Burcu joined Parla, where she collaborated with craftsmen to explore materials closely. Her designs blend different textures, geometric forms, and East-West influences. Known for customizable products, Burcu is now a product manager and continues her personal design projects

Klan Studio

Founded by Esref Akin Oral and Isik Gorgun Oral, Klan Studio specializes in furniture, yacht, and machinery design. They define themselves as modernists, prioritizing efficiency, clever design, and consistency, always delivering the 'right design' for each project brief.

Kunter Sekercioglu / Kilit Tasi Design

Kilit Tasi, based in Istanbul, offers industrial design, design management, and strategic consultancy across various sectors. Partner and Design Director Kunter Sekercioglu draws inspiration from culture, craftsmanship, and daily life. He ensures quality by being actively involved in every stage of the design process.

Matthew Goodrich & Hines Fischer

Goodrich is a multidisciplinary design practice specializing in hospitality, offering branding, interior design, strategy, and product design. Driven by curiosity and empathy, they create unique, integrated solutions and work with collaborators to design impactful environments for communities.

Esin Sozer Kalender

Founded in 1994 by Murad Denizalti, Muge Hansoy Kinaci, and Esin Sozer Kalender, Arketipo Design has completed over 180 projects worldwide, including hotels, spas, offices, and residential spaces. Their work spans Turkey, Dubai, Germany, Russia, Libya, Kazakhstan, and Ukraine.

Umut Karginoglu

Born in Gaziantep, Umut studied Industrial Product Design at Istanbul Technical University and settled in Istanbul. Gaining experience in office, restaurant, and urban furniture design, he specializes in product design, model making, branding, and concept generation, with strong engineering skills. He is currently a Product Design and Development Specialist.

Jean-Michel Willmotte

Jean-Michel Willmotte, founder of Willmotte & Associés in 1975, is a French architect and urban planner. His firm, operating in 23 countries with 270 employees, specializes in luxury, hospitality, residential, and commercial projects. Willmotte also founded the design studio Willmotte & Industries.

José Manuel Ferrero of estudi{H}ac

With 20 years of experience José Manuel Ferrero is known for his discreet, elegant, and highly creative design style. Founder of estudi{H}ac, his atelier has become a reference in national and international design, specializing in custom products, interiors, and exhibitions.

The Collection

Crafted through the synergy of our 15 in-house designers and international collaborators, the 'Parla Collection' embodies our commitment to design excellence.

Garnering steady expansion over 3 years, we've forged a presence in key markets like the UK, Europe, USA, and GCC, boasting 30+ dealers.

Our global footprint spans New York, London, Dublin, Istanbul, Miami, Dallas, and Dubai, underscoring Parla's evolution into a world-renowned design-focused brand.

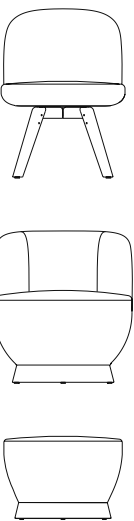

Phil

Designed by
José Manuel Ferrero
of estudi{H}ac

PHIL was designed by José Manuel Ferrero of estudi{H}ac and crafted by Parla. Inspired by the delicacy and simplicity of pincushions, an iconic tool in the history of tailoring and sewing, pieces are rounded, inviting and also functional. An exploration of different versions, shapes, materials and finishes, PHIL captures the organic lines that evoke the essence of the concept beautifully.

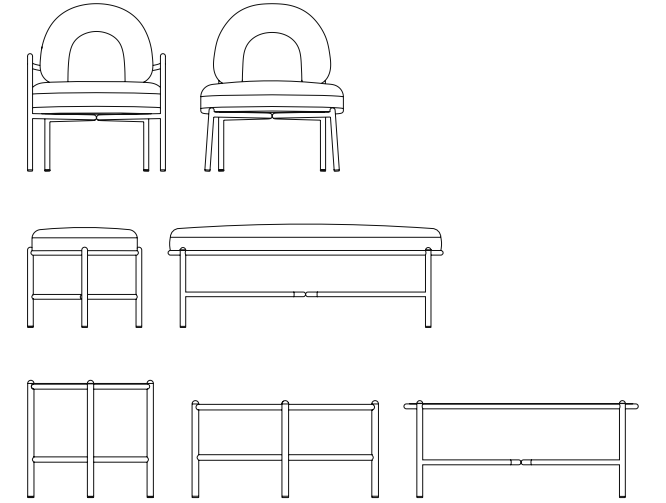

Rise

Designed by
Tugce Yakup

Tuğçe Yakup's intention in creating Rise was to challenge the boundaries of the production techniques and materials used at Parla. Being a rounded product, the design requires a high level of expertise to bring its shape to life while ensuring ergonomic qualities and maintaining simplicity. For Rise, master metal craftsman İbrahim Yeşilyurt uses a unique machine to bend the metal—a machine he never allows anyone else to use. This product is therefore a testament to the special bonds that form between designs and their makers throughout the production process.

Palm

Designed by
Jean-Michel Wilmotte

PALM COLLECTION

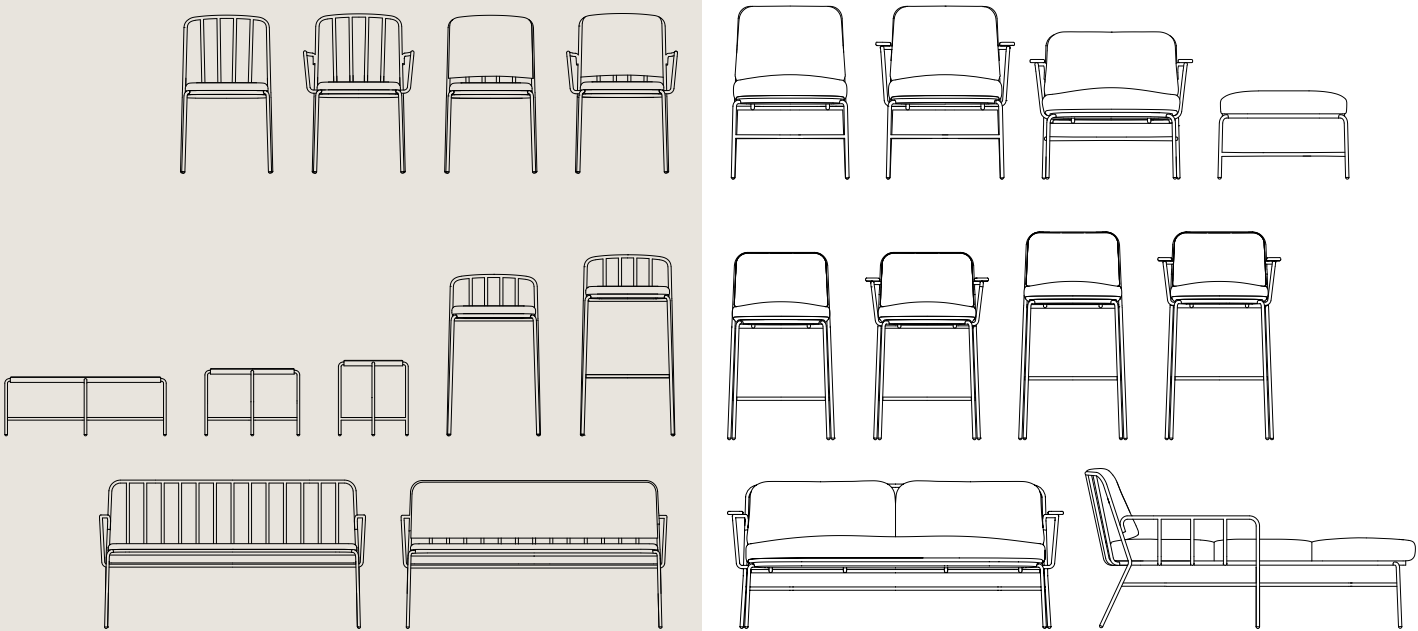

Frame: Powder coated metal structure with armrest
Seat & Back: Upholstered seat Armwrap and armrests are optional (additional cost)

Clean lines and subtle elegance are the two distinguishing elements that lead the way in our collaboration with Jean-Michel Wilmotte. “Inside, outside: a new praise of the dark” is how Jean-Michel explains his design ethos for the Palm Collection, using an interplay between light and shadow, sleek lines and block colours, adding rhythm to their surrounding spaces.

Hew

Designed by
Matthew Goodrich &
Hines Fischer of Goodrich

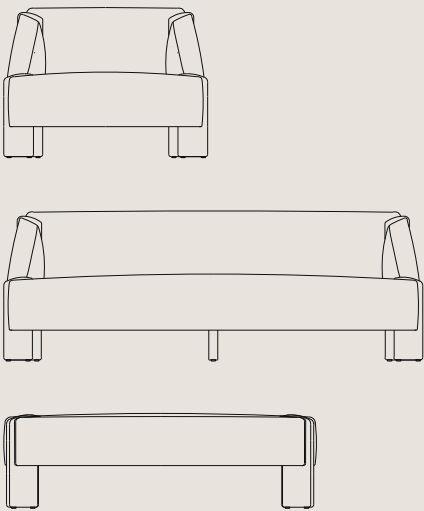

Hew marks the first collection designed by Matthew Goodrich and Hines Fischer for Parla.

Instilling a sense of motion in the design, unbroken swaths of fabric give unique opportunities to play with directional and large scale fabric patterns without worrying about seams, and elegantly carved wood pillars separate the sections.

Hug

Designed by
Betul Inci

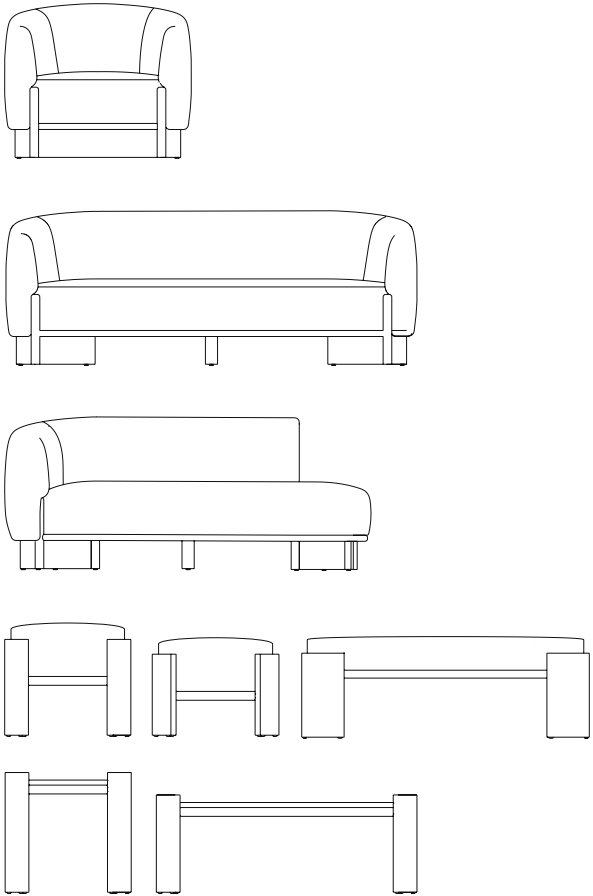

Offering a contemporary twist on retro furniture, it exudes charm while maintaining the highest quality. Adding warmth and welcome to interiors, Hug is the perfect choice for public spaces in hospitality interiors.

Designer Betul Inci aimed to showcase our exceptional craftsmanship skills in this design, highlighting high-level expertise in both design and woodwork.

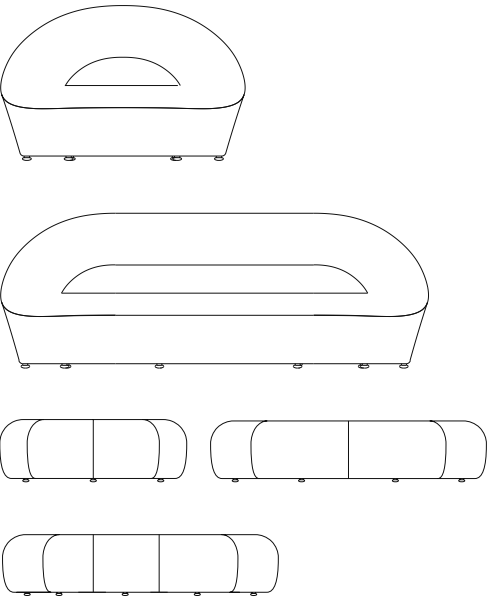

Loop

Designed by
Matthew Goodrich &
Hines Fischer of Goodrich

For our second collaboration with Hines Fischer and Matthew Goodrich we developed their design sketch and were able to bring to life a collection of oversized pieces with inviting rounded soft volumes. Making you feel at home, pampered and relaxed, Loop is both aesthetically pleasing and very design conscious.

Nigiri

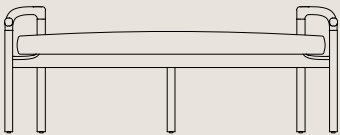

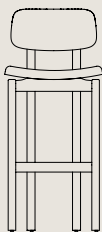

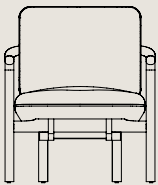

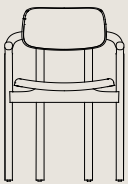

reddot winner 2025

Designed by
Betul Inci

The Nigiri collection blends Far Eastern style with contemporary aesthetics. Distinctive structural lines highlight the artisan craftsmanship of the frame at the same time as giving gentle and supple support for the back. The Nigiri combines traditional and technological methods perfectly in one chair, bringing about contemporary aesthetics.

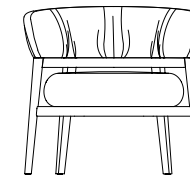

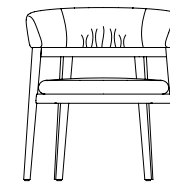

Cora

Designed by
Seda Yetkiner

Inviting not only due to the comfort it promises, but also pleasing to the eye, this armchair gives you seating that restores and revitalizes.

Rounded in nature, it creates a sanctuary of a space for the user; and the different sections offer multiple variations in finish, colour and texture. The enticing upholstered sections are supported by an elegant solid wood frame, giving the design a refined look suitable for a variety of hospitality and restaurant interiors.

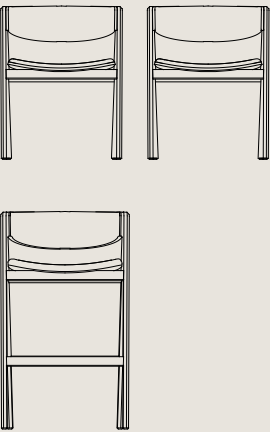

Gala

Designed by
Burcu Ozdamar

Gala is a nod to the past with excitement for the future. A well balanced design, with comfort and simplicity complimenting a strong frame that is also beautifully crafted.

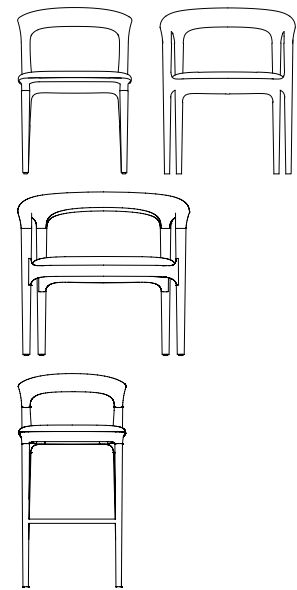

Fau

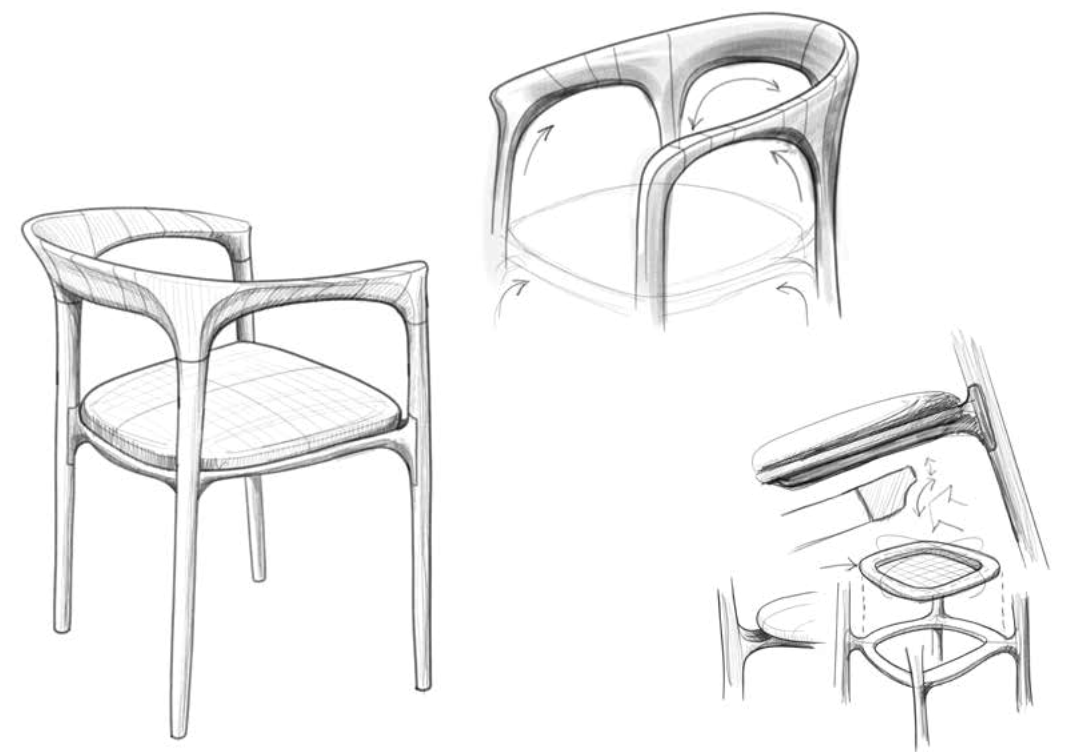

Designed by
Kilit Tasi Design Studio

Design, understated glamour and finesse all come together in this chair that has been brought to life through a collaboration with industrial designer Kunter Sekercioglu.

A design wonder of a chair, it stands out of the crowd with its, light but stable structure, comfortable seat, and perfect curves of the wood.

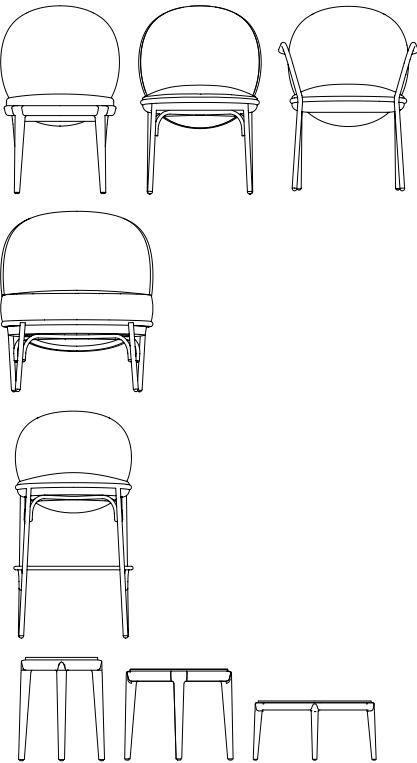

Oyster

Designed by
Enis Altinkaynak

Oyster is a furniture range whose design is inspired by shells and similar natural forms. The characteristic softly rounded silhouette of the upholstery is reminiscent of a seashell. Aimed at both corporate and private environments the Oyster is for indoor use.

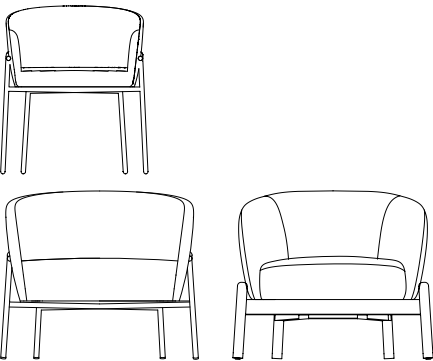

Rimo

Designed by
Berrak Ilkcan Sener

Rimo Armchair combines simplicity and comfort by embracing the user with its soft upholstery. Rimo blends in perfectly with different interiors despite its eye-catching form, comprising of a minimal frame and a generous foam seat.

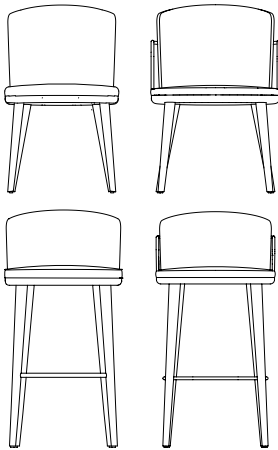

Cosentino City Istanbul
Istanbul, Turkiye

Arven

Designed by
Burcu Ozdamar

The Arven collection blends contemporary taste with a unique metal frame that highlights the elegant form. The Arven family is a sophisticated collection, which adds a touch of informal elegance to any room in which it is placed.

Pınar Hotel
Balıkesir, Türkiye

Xaylon

Designed by
David Fox

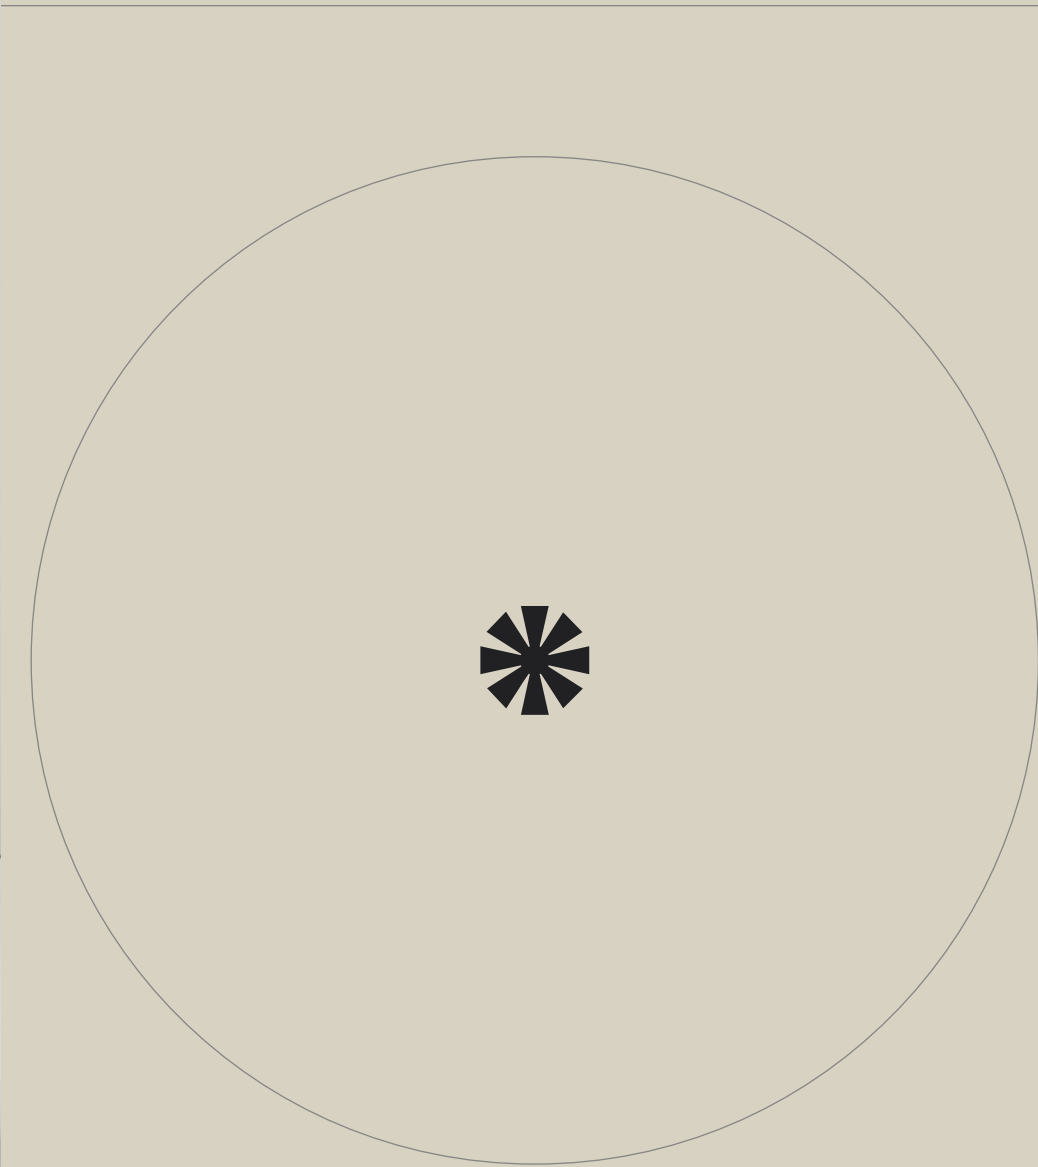

As a statement piece for lounge areas, elegant and luxurious Xaylon Armchair aims to bring a comforting yet refined character to the environment. Xaylon's design contains carefully considered fly, pipe and wrinkle details; reminiscent of the interiors of timeless classic cars.

As a statement piece for lounge areas, elegant and luxurious Xaylon Armchair aims to bring a comforting yet refined character to the environment.

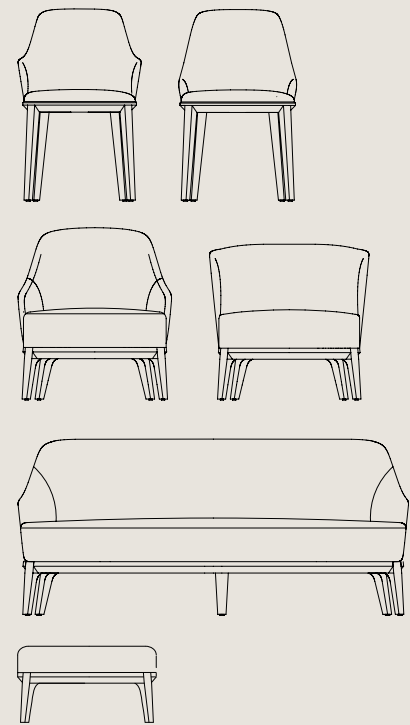

Atlas

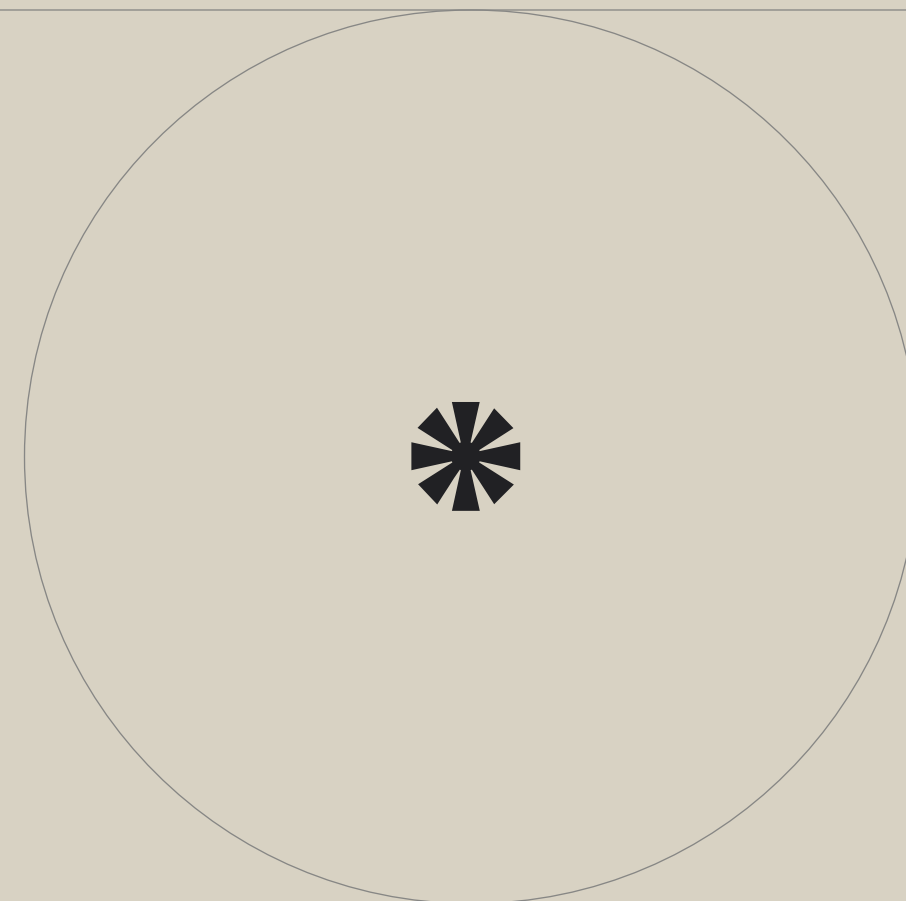

Designed by
Betul Inci

The Atlas Family is a testament to Parla Design's heritage; an element of comfort is added to a fine silhouette to continue our forefathers' spirit.

Tofu

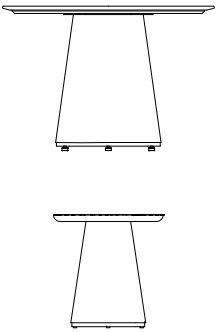

Lending both power and beauty to the pieces with its sculptural base, the Tofu family of tables are perfect for displaying the natural beauty of materials with a sculptural base that lends power to the piece. All pieces are available in exquisite stain colours and table top options such as marble, tinted glass and oak veneer.

Designed by
Seda Yetkiner

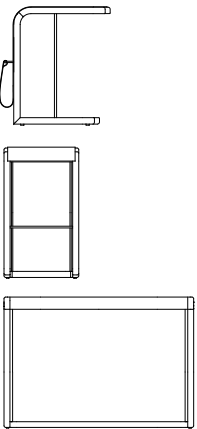

Flento

Designed by
Berrak Ilkcan Sener &
Yasemin Derici Ceri

The Flento Collection, which contains a variety of elements, makes a statement with sophisticated metal embellishment to a wooden base, softened and made inviting by gentle curves. The Flento console, side table and stool, which perfectly complement one another, also work well alongside other styles, giving a fresh perspective to classic and sophisticated looks.

Mawe

Designed by
Yasemin Derici Ceri

The sculptural, totemic Mawe Coffee Tables, are designed taking inspiration from the "Moai" sculptures in Ahu Akivi, Easter Island. Designer Yasemin Derici, who likes to look beyond borders for inspiration, wanted to bring together the solidity of marble with the fragility of glass, and the Moai sculptures sparked a light in her imagination. Alike their inspiration, the coffee tables offer a distinct look and a very precise finish.

Rain

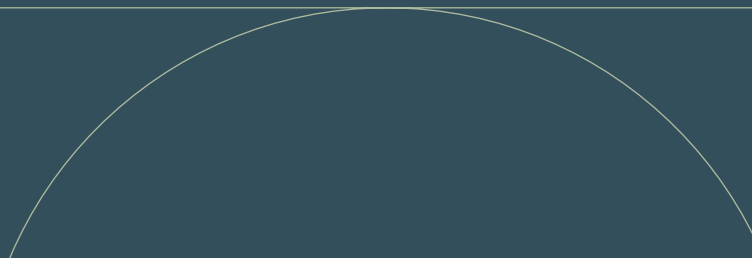

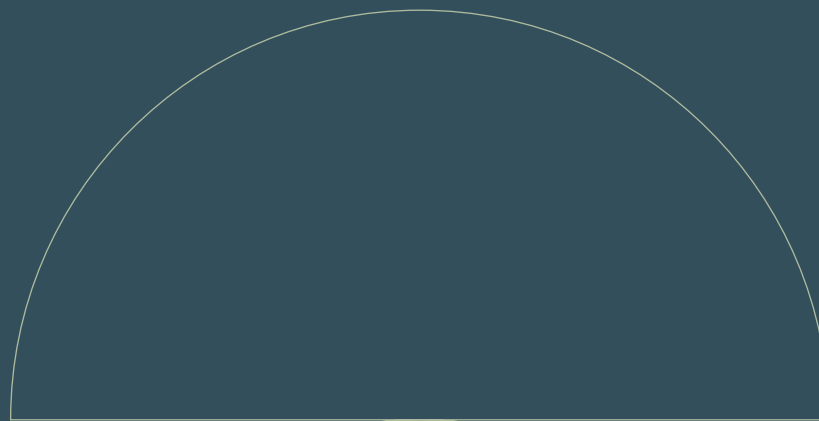

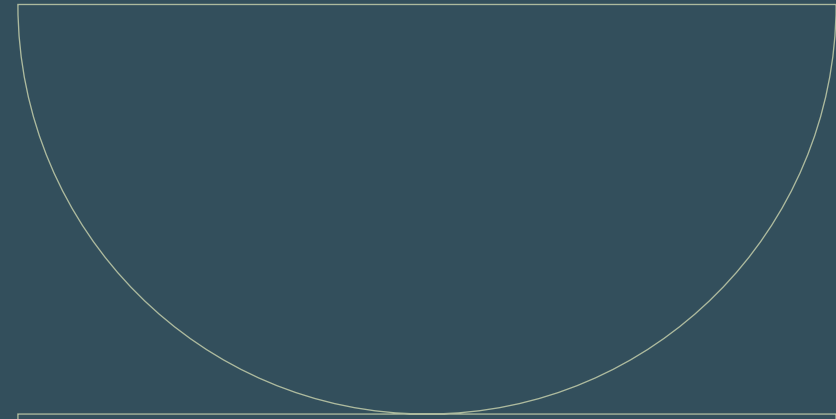

Designed by
Buket Hoscan Bazman

Our first set of sideboards, Rain offers contemporary luxury; perfectly proportioned, these sideboards encompass coloured steel, wood, and LED lighting, that are all then presented in a beautiful curved form.

Guide for Care & Maintenance

Thank you for choosing Parla.
Our mission is to manufacture products that meet the highest standards in design, quality and functionality.

Regular professional care extends the life time of each product and thus also your satisfaction with its use. You can find some useful information on how to use and carefully maintain our products below.

SOLID WOOD
INDOOR USE

The Solid wood we use is an actual living part of the tree it comes from, and is composed of wood fibers that are held together with adhesives.
At Parla, our most popular choice of solid wood is Beech, and what we do is create pieces of lumber that have their own characteristics; unique in grain pattern, colour, and texture. As a result each piece of solid wood displays different behaviour and form when different carving techniques are used. Unlike wood veneer, solid wood pieces are frequently used for curved and multi-dimensional pieces.

ASH

With a neutral colour base, ash trees are very durable and robust. Ash also has better resistance to sunlight and its possible corruptive effects.

BEECH

Having a light-pink undertone, beech wood is very easy to form, therefore easy to use for curved shapes and round corners requiring further surface processing. Parla Collection products are generally produced using Beech wood.

RECOMMENDATIONS

We recommend cleaning the surface regularly with a slightly damp soft cloth. Do not use heavy chemicals for cleaning purposes and protect the surface from sharp objects to avoid scratching.
*As wood is a living material, variations in colour, pattern, and pigmentation will occur on each piece.

*Wooden furniture will also change appearance over time as it is affected by the environment (daylight, humidity, etc.) in which it is placed.
*Solid wood furniture should not be placed too close to heat sources nor should it be in frequent contact with liquids.
*Do not use abrasive materials.

WOOD VENEER
INDOOR USE

A veneer refers to a thin layer of wood peeled or cut from a section of a tree. It is then bonded onto a thick piece of wood, typically MDF, chipboard, or plywood. These layers are classified later according to their cutting technique and final patterns. At Parla, we use quarter cut veneer sheets with slip matching on plywood as standard. Each veneer table layer is unique. No matter how expertly cut or treated, none of its layers are identical to another, which is the charm of using natural materials. Veneer provides high-quality looks without the need for large amounts of wood consumption.

OAK

A somewhat brittle material when processed, oak is very resistant to heavy weather conditions and harsh climates as a tree. Being a durable and robust form, oak pieces require expertise and unique production techniques.

WALNUT

A tree familiar with mild climates, the walnut tree has high fibers resulting in splendid and rich patterns on its layers. Easy to process, walnut has high aesthetic qualities however it requires suitable methods to bring out its beauty and strength.

RECOMMENDATIONS

We recommend cleaning the surface regularly with a slightly damp soft cloth. Please wipe the veneer following the direction of the wood grain. Compared to solid wood, wood veneer is less resistant to heat and moisture, especially around the edges where layers of wood are visibly pressed. Extreme heat and any contact to water must be avoided, especially around the edges.
*Veneers generally have color differences compared to their matching solid wood stain options. Which are usually used for chair legs or supportive elements. We, therefore, especially recommend using wood veneer material for stained table tops and legs.

*Do not use oil or ammonia-based products to clean wood veneer.

*Do not use abrasive materials.
METAL
INDOOR USE

Metal, brass, aluminium, and stainless steel are the most preferred materials at Parla for the metal components of furniture we produce. Depending on the product type and place of use, metal surfaces are available in Powder Coated Textured (outdoor) or Matt (indoor) or PVD Coated; Polished or Brushed (indoor) finishes.

STAINLESS STEEL

Durable and more accessible, stainless steel is perfect for structural elements and metallic finishes. PVD coating can be used with different finishes, as shown in our coloured steel options.

METAL & ALUMINIUM

Parla recommends Powder Coated metal in matt finish for indoor use and aluminium or treated metal in textured finish for outdoor use. Aluminium is a rust-resistant and light material that can be used directly with powder coating without further treatments. However, we recommend using powder coated aluminium with a textured finish to increase the hold of coatings that protect the metal from heavy conditions of outdoor use. Metal materials on the other hand need to be pre-coated with cataphoresis treatment before coating for protection over rust and corrosion.

RECOMMENDATIONS

We recommend cleaning the surface with a damp cloth and wiping the surface immediately after.

- *Do not use alcohol.
- *Avoid using abrasive materials that can alter or scratch the surface.
- *For PVD coatings, Parla uses an environmentally friendly Anti Fingerprint solution. Creating a protective layer over stainless steel, this solution creates an easy-to-clean surface, reducing fingerprints.
- *it is not recommended to use PVD Coated steel under direct sunlight for extended periods since it can affect the coating colour over time.

GLASS & STONE

GLASS

Characteristic results of glass manufacturing such as tiny air bubbles, thickness variations and light pitting, should always be expected with glass. All glass used in our furniture is tempered to ensure excellent durability. For painted glass, all RAL colour options are available and the final finish is tempered extra clear glass with colour.

MARBLE & STONE

Travertine Stone and marble are natura and porous materials of sedimentary origin. They are usually collected as stone blocks which are later cut into layers of stone using a delicate process. The texture of these stones depends on grains. The formed and pressured element groups to create mesmerising grains and layers makes each piece unique. The density of these element groups determines the colour and patterns of the stone.

Before using them as furniture parts stones are treated with an invisible solvent-based chemical to

sustain their surface integrity. It penetrates stone pores and protects their surface against dirt, dust, water or stains, generating an easy clean effect. Due to its porous nature this treatment must be applied every few months to help the surface reach its entire service life.

RECOMMENDATIONS

We recommend carefully cleaning the surface with a barely damp soft cloth to avoid scratching the surface.

Marble is porous and has a poor resistance to acidic substances (vinegar, lemon juice, wine, tea, coffee, etc.) that even in small quantities can corrode the surface and penetrate into the pores forming mat spots.

- *Do not use any products containing acetone ammonia, chlorine, solvents, abrasive products and furiture polish, since these might permanently damage the surface of the product making it look opaque with marks.

Glass is not scratch-resistant so avoid dragging objects across the surface. Glass is very resistant to heat sources. St ili we recommend never placing hot obj ects directly on the surface since high temperature differences creates fragile spots on the surface which, could result in cracks.

- *Glass surfaces should be wiped with a clean dry cloth. Cleaning can be done with household ammonia or unique glass cleaning products if the occasion requires it.
- *Never use abrasives or sharp -edged tools to prevent scratching.

OUTDOOR

In the Parla collection, outdoor furniture is categorized into two types: All-Weather and Weather-Resistant, each designed for different environmental conditions and maintenance needs.

All-Weather furniture is built to endure harsh conditions like rain, snow, intense sun, and humidity. Crafted from durable materials such as Iroko wood, aluminum, stainless steel, rope, and quick-dry foam cushions, it requires minimal upkeep—occasional cleaning is sufficient. Ideal for open spaces, it doesn't require covers, but using them can extend its lifespan.

Weather-Resistant furniture offers moderate protection against mild rain, UV exposure, and limited moisture. Made from powder-coated metal and standard outdoor cushions, it needs periodic maintenance, such as re-coating and refinishing. Best suited for partially sheltered areas, it requires covers during harsh weather, and cushions should be stored indoors when not in use.

SOLID WOOD

OUTDOOR USE - IROKO

Iroko is a particular type of timber that grows in rainforest weather conditions, making it highly durable for outdoor use. With its high density of fibers, Iroko can extract minerals and particles from the soil. Because of these features, Iroko grows much faster than traditional timber types and can be produced in a fast-paced sustainable cycle. Iroko also showcases its stain colors distinctively due to its unique, light yellow based color.

METAL & ALUMINIUM

OUTDOOR USE

Since it is rust-proof, we use powder coated aluminium or pre-treated and powder coated metal structures for outdoor furniture. For outdoor use, we recommend powder coated metals with a textured finish, pre-coated with cataphoresis treatment to increase the paint's grip and protect the metal from heavy conditions of outdoor use. For aluminium, powder coating can be applied directly.

ROPES

The weaving technique and rope options create a vast playground for furniture designers. With round and flat options, hand woven ropes are carefully placed according to templates by professionals constructed by very skilled craftsmen. Woven from pre-UV treated strands, outdoor ropes also have a multi-layered internal structure, making them highly resistant to tension, colour fade and heavy weather conditions.

RECOMMENDATIONS

We recommend cleaning the Iroko surface regularly with a slightly damp soft cloth. *Do not use heavy chemicals for cleaning purposes and protect the surface from sharp objects to avoid scratching. *Although they can be in touch with it, outdoor furniture mustn't be in direct contact with salt water for long periods of time since it can cause corrosion. Also, direct exposure to sunlight for extended periods will eventually affect Iroko's colour. *Do not use any chemicals for cleaning powder coated metal, clean with damp cloths or water. *For extreme weather conditions, UV treatment types for outdoor ropes may vary. Please specify area of use to select the suitable treatment type.

UPHOLSTERY

GENUINE LEATHER

Natural leather has a pleasant characteristic smell and is wear resistant. Its quality depends on the animal's lifestyle as well as on the method of leather processing. Minor defects originating during the animal's life, such as wrinkles, blood veins, scars, scratches, etc. are regarded as permissible and are even required as evidence of the .genuine and unique' quality of the leather.

RECOMMENDATIONS

The best maintenance for leather is regular vacuuming with a soft brush. Avoid using cleaning products and sharp objects. If cleaning is necessary use boiled water with natural soap shavings of good quality. Whip 2-3 tablespoons of soap flakes in 1-liter water and only use the foam. Apply the foam with a soft cloth, let the furniture dry and dry afterward the leather off thoroughly with a soft cotton cloth.

ARTIFICIAL LEATHER

Artificial leather is usually undemanding in maintenance.

RECOMMENDATIONS

Remove dust regularly with a fine suction force of your vacuum cleaner or with a wet cotton cloth. *Dry spilled liquids immediately by a dry cotton or paper towel. *Do not let other stains dry on the surface but remove them immediately with lukewarm water. *Wipe the surface carefully with a moistened cotton cloth and dry with a dry towel.

FABRIC

Cleaning and maintaining upholstered furniture regularly is important to retain the appearance of the fabric and to prolong its lifespan. Over time, dust and dirt can cause furnishing fabrics to change color and exacerbate wear.

RECOMMENDATIONS

Vacuum the furniture regularly using the upholstery nozzle to remove dust and avoid fluff and pilling. Straighten the fabric with your hands from time to time. Wrinkles in the fabric can be straightened using a steamer. Soak up spilled liquids immediately with an absorbent napkin or cloth by dabbing gently towards the centre of the stain. *Never use concentrated detergents or bleach, ammonia, optical brighteners or soap intended for hard surfaces. *We do not recommend spot cleaning of individual marks and stains as this damages the fabric and causes colour loss. *Avoid rubbing the material hard as this could result in loss of colour and damage the fabric.

We kindly ask you to follow

instructions and recommendations contained in this manual.

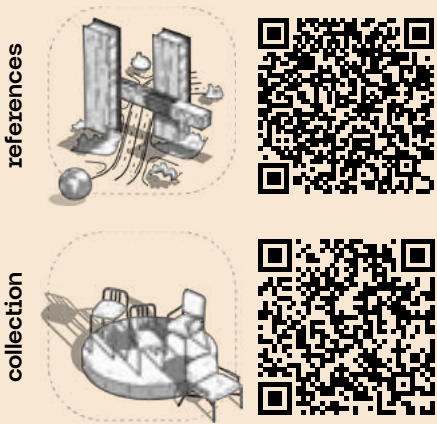

Regular professional care extends the life of your product and besides can be also a condition for warranty compensations. The manufacturer does not take any responsibility for potential damage to the product resulting from unauthorised use and unprofessional handling of the furniture.

Parla is constantly working on further development of all products, which may cause some changes in used materials, constructions and finishing. As a result of this the recommendations and guidelines for the proper use of products may be also changed. Thank you for your understanding and we wish you pleasant moments spent while using our products.

*The products displayed in this catalogue are to be considered as sample configurations. The textures, colors of materials, and finishes are indicative due to variations that may result from the printing process.

For any technical specifications and/or dimensions, please get in contact with our sales team. Parla Design reserves the right to change, without prior notice, materials, covers, finishes, and drawings presented in this catalogue.
